Leading Air Conditioner Suppliers in Australia. Carrier Air Conditioners are leading air conditioner suppliers in Australia. We provide sustainable solutions, integrating energy-efficient products, building controls, and energy services for residential, commercial and retail customers at a competitive price.

Includes Part 1A: Books and Part 1B: Pamphlets, Serials and Contributions to Periodicals

This book describes some of the improvements in natural gas technologies, covering both engineering concepts and products which have emerged, as well as important innovations to existing technologies. It includes analyses which identify the cost savings attributable to the technologies described.

In the Design Professional's Guide to Zero Net Energy Buildings, Charles Eley draws from over 40 years of his own experience, and interviews with other industry experts, to lay out the principles for achieving zero net energy (ZNE) buildings, which produce as much energy as they use over the course of a year. Eley emphasizes the importance of building energy use in achieving a sustainable future; describes how building energy use can be minimized through smart design and energy efficiency technologies; and presents practical information on how to incorporate renewable energy technologies to meet the lowered energy needs. The book shows the reader through examples and explanations that these solutions are viable and cost effective.

This book is a comprehensive guide for developing an effective preventive maintenance program for any facility. Topics include facility inspection and assessment, effective lubrication practices, commercial roofing repair, indoor air quality management, applicable government codes, standards and regulations, detailed preventive maintenance procedures, and maintenance scheduling. Specific maintenance approaches are examined for more than 100 types of equipment and building components. Also discussed are the economic value of preventive maintenance, management and motivation of the preventive maintenance team, and setting up a computerized maintenance management system (CMMS).
