This book presents recent findings on the role of oxidative stress in chronic diseases. Understanding the mechanisms behind it enables readers to comprehend the rationale which underlies intervention in such conditions. The book places special emphasis on genetic polymorphism—an important issue related to this field of study. It covers the role of oxidative stress in transmissible disorders as well as non-transmissible chronic conditions with chapters on metabolic diseases, autoimmune and neurodegenerative diseases, and cancer and cachexia. Each chapter covers a different disorder and the efficacy of interventional procedures.

Classically wrought in the ways of the sages, the beautifully penned Ponder Awhile shares the complexities of life as a simple and accessible dose of spirit and soul stuff. Author and poet Mohit K. Misra leaves no stone unearthed as he dons the robes of a mystic, though is plainspoken, lilting, and at times, playful with his language and words. Written as Dohas or couplets, each stanza of the forty eight poems found in this collection chases the glow of a new dawn of world enlightenment. Straightforward, uncomplicated and wise, with titles such as "Mother Earth," "Married to the Light," "Religions," and "Peace," the author examines and dissects the frailty of life, the inevitability of death and the most tender part of the stalk and the root. These poems are necessary, irresistible and evolved. Courageous in their simple message, God and His many faces are pressed into the window box for all to see and celebrate.

The poet encourages introspection, deliberation, mediation and the search for deeper meaning. His poems of praise, poems of contemplation and poems of provocation sing God's praises, His justice and His grace. Knowledge leads to understanding, which leads to peace and, finally, to love. It is what the world needs-a little of God's love, the fabric, the sheer essence; the gems of the universe unfold on these pages. And we are, as readers, better for these gifts.
